

Mercat d'emissions

La pàgina principal de l'eina inclou:

Un gràfic on es representa el preu per tonelada de Co2 en la divisa determinada a la dreta. A més s'estipulen el número de projectes disponibles, el preu mig actual i els crèdit dels quals disposes en el moneder.

Una taula amb el total de tonelades generades, les compensades i les pendents per fases d'obra. Abans d'escollir un projecte disponible assenyalarem en aquesta taula l'etapa en la que volem compensar.

Total de emisiones en la obra 2.785,52 toneladas, ya compensadas 0,00 toneladas, 2.785,52 pendientes de compensación.

Etapa que quiere compensar	Etapas	Toneladas generadas	Toneladas compensadas	Toneladas pendientes
☐	Producto	2.749,34	0,00	2.749,34
☒	Construcción	36,04	0,00	36,04
☐	Uso	0,14	0,00	0,14
☐	Final de vida	0,00	0,00	0,00

Finalment trobarem els **projectes disponibles** amb una breu descripció d'aquets.

Proyectos disponibles

RIPPLE AFRICA COOKSTOVE PROJECT

DETALLES DEL PROYECTO

Objetivos de Desarrollo Sostenible (ODS)

País: Malawi

Web del proyecto: <https://cdm.unfccc.int/Projects/DB/TUEV-SUED1397540352.85/view>

Documento de validación: [Document](#)

Tipo de certificación: CDM

Emissiones de co2 disponibles: 500 t Estado: Registered BC-ADDRESS: GODHYXIADQHP3TBD3PXDCSMTFBR7APNRYWJGTDPBM4SD3Y3WQA2RE6

This cook stove project is run by Ripple Africa (a UK charity) and benefits approximately 200,000 people in Malawi. Ripple has so far replaced about 40,000 traditional three-stone cooking fires with fuel efficient cook stoves. This project is reducing greenhouse gas emissions as well as preventing deforestation and reduces respiratory diseases and the risk of burns. Locally, the fuel efficient cook stoves are known as Changu Changu Moto. This translates to Fast Fast Fire. The stoves save wood, so women only have to collect one bundle of wood per week instead of three. They also cook faster and two things can be cooked at once. This gives women extra time. Time they wouldn't ordinarily have, because in Malawi women carry out the majority of household chores and also look after the children. Children spent as much time in the kitchen as their mothers. Three-stone cooking fires were very dangerous for children because they are essentially open fires. So far, Ripple Africa has recorded a 60% decrease in burns because not only is the fire contained but the pot-stands make for a more stable surface for the cooking pots. Other health benefits are important as well. Traditional three-stone fires create a lot of smoke and more people die from smoke inhalation related diseases than from malaria. The fuel efficient Changu Changu Moto produces much less smoke than the traditional method. Ripple Africa has made this fuel-efficient cookstove a way of life and improved the quality of life for those who have one, as well as significantly reducing Malawi's greenhouse gas emissions. Have a look at our video on YouTube: <https://www.youtube.com/watch?v=XhVjg7q1Q> Offset sales will not only maintain this project but also support Ripple's other activities such as tree planting, forest conservation, fish conservation, education and healthcare services. Precio por tonelada 12,79 €.

0 toneladas compensadas en este proyecto.

El máximo de toneladas que se pueden compensar en este proyecto es de 500.

Toneladas a compensar: Importe: Gestión Climatetrade: Motivo de la compensación:

0 0,00€ 0,00€

Compensar

Per realitzar la compra de **crèdits de carboni** haurem d'omplir els ítems que apareixen a sota de la descripció dels projectes.

Precio por tonelada 12,79 €.

0 toneladas compensadas en este proyecto.

El máximo de toneladas que se pueden compensar en este proyecto es de 500.

Toneladas a compensar: Importe: Gestión Climatetrade: Motivo de la compensación:

0 0,00€ Climatetrade: 0,00 €

Podem compensar les emissions de Co2 comprant crèdits de diferents projectes. Una vegada finalitzada la selecció, farem clic al botó compensar i ens generarà un certificat al següent apartat **Moviments de compra**.
